Chetan Deshpande

About Me

Dedicated and enthusiastic software developer with 2.5 years of experience in frontend and web application development using React.js, Python, and Django. Seeking a position in a reputed organization where I can utilize my technical and problem-solving skills, contribute to business growth, and gain exposure to advanced technologies and real-world projects.

EXPERIENCE

Software Developer:	Christ Infotech	06/2024– Present
• Designed and developed web applications from scratch based on client requirements using Python, Django. • Implemented application functionalities according to Software Requirement Specifications (SRS). • Developed responsive frontend interfaces. • Worked on multiple projects involving React.js, Python, and Django technologies. • Debugged and enhanced existing applications to improve performance and usability. • Conducted MS Office training sessions and Python Development bootcamps. • Guided students in project development and practical implementation of programming concepts.		
Associate:	Symphony Talent	05/2022 – 08/2022
• Produced clean, efficient code based on specification. • Requirement analyse, design, code and testing, etc. Debugged the front-end issues / bug. • Recommend changes to improve established java application processes. • Troubleshoot, debug and upgrade existing software. • Analyse the program to identify the code changes as per the business requirement.		
Intern:		03/2022 – 05/2022
• Produced clean, efficient code based on specification. • Contributed to project using Eureka Server.		

EDUCATION

M.Sc. (Computer Science)	Sangameshwar College, Solapur	07/2019 – 03/2021
• CGPA: 9.24/10.		
B.Sc. (Computer Science)	Sangameshwar College, Solapur	06/2016 – 02/2019
• CGPA: 7.80/10.		

SKILLS

- Python, Django, Java, Spring Boot, MVC, ASP.NET, C#
- HTML, CSS, JavaScript, Bootstrap, NodeJS, ExpressJS
- Angular, React, jQuery, Ajax
- SQL, DBMS

PROJECTS

- **Event Management System**

- **Language/Technology: Python, Django**
- Event Management System is built using Python, Django and SQLITE3 as database.
- It aims to help event managers those who have own Event Management Company.
- Event manager saves all the information of event packages in details.
- According to event requirement manager allocates the task to all the vendors. (e.g.: catering, decoration, etc)

- **E-COM-API Project**

- **Language/Technology: Node.JS, MongoDB**
 - Developed RESTful API for seamless communication between front-end and back-end components.
 - Integrated database management system for efficient storage and retrieval of product data and user information.
 - Implemented robust user authentication and authorization mechanisms for secure access control.
 - Designed advanced functionalities including product search, cart management and user management.
-
